A **Managed server** with a provider you can trust

Host in confidence and first-class with Crucial Concierge and premium support.

Once you invest in the Managed VPS, you will have access to your own personal Crucial Concierge, like Aden off to the right. Aden will be providing you with a first-class support experience, hassle-free onboarding and fully managed migrations.

After signing up, Aden will give you a call find out how you would like your server set up, if you need to be migrated from another provider, and then he will handle the rest.

Crucial Concierge is an industry first, paving the way to the ultimate experience in managed hosting.

Managed VPS with Crucial.

Some of your included features:

CloudLinux helps to balance your server resources across cPanel accounts. This helps to prevent against 'noisy neighbours' and ensures consistent performance for all of your customers.

By limiting the resources each cPanel account uses, CloudLinux will prevent the server from using all the available memory, improving its stability and protecting your sites from going offline.

It will also Cage off each cPanel account, ensuring if one site is compromised the others on the server wont be affected.

Included as standard in the Managed VPS

Managed VPS with Crucial.

Some of your included features:

R1Soft Backup works by taking a full server backup, then incremental or 'changed-file' backups each night, thus creating 7 daily recovery points.

The advantage of R1Soft Backup over the typical FTP or image backup is the ability to login to the R1Soft Backup control panel via a web interface, browse and restore individual files or folders.

Crucial's R1Soft solution backups are an on/off option which covers the server from top to bottom so there's no need to worry about quotas or caps.

Included as standard in the Managed VPS

A Managed service with a provider you can trust.

Managing a web server can take up time away your business. The solution is Crucial's Managed VPS, giving you access to a team of experts who will manage your upgrade to a fast, secure and dedicated hosting environment for you.
